EDUCATION

Thapar Institute of Engineering & Technology, Patiala

Aug 2023 – May 2027

Bachelor of Engineering – Computer Science & Engineering | CGPA: 8.41

Batch: 2023 – 2027

GMSSS, Sector 16, Chandigarh

2021 – 2023

Senior Secondary (12th) – PCM

Percentage: 91%

Manav Mangal High School, Chandigarh (Sector 21)

2019 – 2021

Secondary (10th)

Percentage: 92.6%

SKILLS SUMMARY

Programming Languages: C++, JavaScript, Java, Python, SQL

Frontend Technologies: React.js, HTML5, CSS3, Bootstrap, JSX

Backend Technologies: Node.js, Express.js, Mongoose, Spring Boot, Spring MVC, Hibernate, JDBC, Servlet, JSP

Databases: MongoDB, MySQL, Firebase

Tools & Platforms: VS Code, IntelliJ IDEA, Eclipse, Git, GitHub, Maven, Postman, Vercel, Render, AWS, Figma, Canva

Core Concepts: Data Structures & Algorithms, OOP, Computer Networks, DBMS, Machine Learning (exploring)

PROJECTS

• CloudShare [\[GitHub\]](#) | [\[Live\]](#) | [\[Swagger\]](#)

Tech Stack: Spring Boot, Spring Cloud Gateway, PostgreSQL, Redis, Cloudinary, React.js

- Developed a full-stack, microservices-based cloud storage platform with independent authentication and file management services.
- Implemented secure API authentication and authorization using JWT and configured centralized API routing through Spring Cloud Gateway.
- Integrated Redis for caching and Cloudinary for scalable cloud-based file storage and management.
- Preserved folder hierarchy and implemented fast file search for efficient storage and retrieval.
- Documented REST APIs using Swagger and decomposed the monolithic backend into modular, independently deployable microservices.

• CampusRide [\[GitHub\]](#) | [\[Live\]](#) | [\[Swagger\]](#)

Tech Stack: Spring Boot, PostgreSQL, Spring Data JPA, React.js, Redis

- Developed a campus-focused cab booking solution connecting students and drivers under admin supervision.
- Implemented secure authentication and authorization using Spring Security and JWT.
- Designed and optimized backend APIs with structured exception handling and DTO-driven responses.
- Integrated PostgreSQL for efficient data management and ensured seamless frontend-backend communication.
- Achieved an average API response time of ~120 ms during local testing.

• SkillBridge [\[GitHub\]](#) | [\[Live\]](#) | [\[Swagger\]](#)

Tech Stack: Spring Boot, WebSocket API, MongoDB, React.js

- Created a barter-based learning platform where users can exchange skills and collaborate.
- Built scalable backend services for user authentication, profile management, and skill discovery.

- Designed workflows for barter requests, approvals, and user interactions.
- Implemented real-time one-to-one messaging using WebSocket for seamless communication.
- Developed admin features and documented APIs using Swagger.

• EventSphere [\[GitHub\]](#) | [\[Live\]](#) | [\[Swagger\]](#)

Tech Stack: Spring Boot, PostgreSQL, Spring Data JPA, React.js, Redis

- Built a full-stack event management and ticket booking platform enabling organizers to create and manage events while allowing users to browse and book tickets seamlessly.
- Architected the backend system with secure JWT-based authentication and role-based access control for users and organizers.
- Designed booking workflows, payment validation mechanisms, and email notification services.
- Developed scalable REST APIs using DTO-based design and integrated Redis caching for performance optimization.
- Collaborated on frontend integration to ensure smooth end-to-end functionality.

POSITIONS OF RESPONSIBILITY

- **Head Boy, Manav Mangal High School:** Elected as the senior student representative; organized school-wide events, fostered unity among students, and served as the key liaison between students and faculty.
- **Group Representative (3P1), TIET:** Acted as liaison between students and instructors for Batch 3P1 (Elective), coordinating schedules and resolving academic concerns efficiently.

DSA & CODING PROFILES

- Solved **400+** Data Structures & Algorithms problems across LeetCode, Code360, and GeeksforGeeks.
- Strong command over Arrays, Trees, Graphs, Dynamic Programming, Recursion, and Greedy algorithms.
- Consistent practice with active streaks and badges; solutions implemented in Java with clean logic and edge-case handling.
- Proficient in Binary Search, Two Pointers, Sliding Window, and Hashing techniques.
